CSE 102P Data Structures and Algorithms Lab- Sec A
Test1: 4 February 2026.

Given a positive integer N ($1 \leq N < 10^{18}$), reverse its decimal digits and output the reversed integer without leading zeros.

Input: A single integer N .

Output: The reversed integer.

Examples:

Input: 12345 → Output: 54321

Input: 1000 → Output: 1

Input: 987654321 → Output: 123456789

Constraints: $1 \leq N < 10^{18}$
